

1. TITLE OF THE CERTIFICATE (ES)

**Certificado de Profesionalidad de nivel 3 en
 ELEE0110 DESARROLLO DE PROYECTOS DE INSTALACIONES ELÉCTRICAS EN EL ENTORNO DE EDIFICIOS Y CON FINES
 ESPECIALES**

2. TRANSLATED TITLE OF THE CERTIFICATE (EN)

**Professional Certificate Level 3 in
 ELEE0110 PROJECT DEVELOPMENT OF ELECTRICAL INSTALLATION IN BUILDINGS AND FOR SPECIAL PURPOSES
 (This translation has no legal status)**

3. PROFILE OF SKILLS AND COMPETENCES

The holder of this certificate will have acquired the **general competence** to develop electrical installation projects in buildings and for special purposes based on a given draft design or conditions, in accordance with the specifications, standards and procedures established, ensuring installation quality and safety. This general competence is divided into the following **skills units** (UC):

- Develop projects for control systems for sequential processes in industrial automation systems (UC1568_3).
- Develop projects for measurement and regulation systems in industrial automation systems (UC1569_3).
- Develop projects for communication networks in industrial automation systems (UC1570_3).

The professional skills are acquired through the **learning outcomes** defined within the related Training Modules (MF):

- Development of low voltage electrical installation projects in housing, industrial, office and commercial buildings with public traffic (MF0829_3).
- Development of low voltage electrical installation projects in premises with special characteristics and installations with special purposes (MF0830_3).
- Practical training at the workplace in project development of electrical installation in buildings and for special purposes (MP0283)

(See legal basis for all learning outcomes information acquired by the holder of this Certificate in each MF).

As a reference the learning outcomes include in the Practical training at the workplace that complete and reinforce the learning outcomes acquired in the other training modules, are:

- Prepare general layout plans, detailed plans and electrical diagrams for low voltage electrical installations, based on drawings and diagrams developed with a computer assisted design programme.
- Prepare works units and average cost of a low voltage electrical installation based on the general list of equipment and elements of the installation, taking into account standard rates, or unit prices found in catalogues.
- Define technical specifications for tests and acceptance tests of low voltage electrical elements and installations and prepare relevant documentation.
- Take part in the company's working processes, following the rules and instructions established at the workplace.

4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THIS CERTIFICATE

The holder of this certificate may work in the technical department of a company, in the area of electrical installation project development, regulated by the Low Voltage Electrotechnical Regulation. The holder may also work in the electrical power generation and distribution sector, in the development of low voltage installation projects for housing, industrial, office, and commercial buildings with public traffic, premises with special characteristics and installations with special purposes, as assistant to the advanced technician, regulated by the Low Voltage Electrotechnical Regulation. The most pertinent occupations and positions are:

- Designer of low voltage electrification installations for housing and buildings.
- Designer of low voltage electrification installations for special premises.
- Electrotechnical Designer.
- Technician for electrotechnical projects.

5. OFFICIAL BASIS OF THE CERTIFICATE

Name and status of the national/regional authority providing accreditation/recognition of the certificate

The Ministry of Employment and Social Security or the corresponding autonomous regional administration within the scope of its competence, in the name of the King. The certificate is valid throughout Spain.

Level of the certificate

The Professional Certificate Level 3 of the National Repertoire of Professional Certificates corresponds to level 4 of the International Standard Classification of Education (ISCED-P 2011).

The European Qualification Framework (EQF) level:

Grading scale/Pass requirements

The grading scale and pass level of the training modules are expressed on a scale of 0 to 10. The minimum score for a pass is 5 in every training module including a pass in the practical training at the workplace module.

The grading system is as follows:

- FAIL: 0 to 4.9
- PASS-SATISFACTORY: 5 to 6.9
- PASS-GOOD: 7 to 8.9
- PASS-EXCELLENT: 9 to 10

Access to next level of education/training

This Professional Certificate Level 3 gives access to Professional Certificate Level 3 within the same professional area and family.

For validation purposes, the educational authorities will recognise the professional module or modules of the VET diplomas corresponding to the skills units included in the training modules of this certificate.

Legal basis

Royal Decree 1523/2011 of 31 October, establishing ten professional certificates in the professional family Electricity and Electronics, which are included in the National Repertoire of Professional Certificates. (Appendix I Code: ELEE0110)

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE

This certificate may be acquired by:

1. Training: Completion with a pass grade of the face-to-face or online training programme.
2. Recognition of the professional skills acquired through professional experience or non-formal training (prior learning): Completion of a process of skills evaluation and accreditation in all the skills units making up the professional certificate.
3. Dual training: Completion of a training and apprenticeship contract, which may range from 1 year (or 6 months, if stipulated as such in the collective agreement) to 3 years, during which effective working time is combined with time dedicated to training under the training programme for the professional certificate.

The training method (number 1 above) requires successful completion of the training modules and the practical training at the workplace:

Description of vocational training received	Percentage of total programme (%)	Duration (hours)
Training modules	85	440
Practical training at the workplace	15	80
Total duration of training leading to the certificate		520

Entry/access requirements:

- *Bachiller* Diploma (upper secondary education); or
- Professional Certificate Level 2 in the same professional area.
- If neither of the above or higher certifications are held, a pass in the key skills tests.

Additional information: Professional certificates are instruments for official accreditation of the professional qualifications in the National Catalogue of Professional Qualifications for all economic activities, within the scope of the labour administration. The National Repertoire of Professional Certificates is divided into three qualification levels (Level 1, Level 2 and Level 3), and by sectors into 26 professional families and 102 professional areas. More information is available at: www.sepe.es

National Europass Centre: www.oapee.es

(*) **Explanatory note:** This document is designed to provide additional information about the specified certificate, but has no legal status in itself. The format of the description is based on the following texts: Council Resolution 93/C 49/01 of 3 December 1992 on the transparency of qualifications; Council Resolution 96/C 224/04 of 15 July 1996 on the transparency of vocational training certificates; and Recommendation 2001/613/EC of the European Parliament and of the Council of 10 July 2001 on mobility within the Community for students, persons undergoing training, volunteers, teachers and trainers.
